Thank you for choosing

Torpedo *C.A.B.* **M+**

Updated to include a stunning clean preamp, audio enhancer, tuner, additional reverbs and noise gate to work seamlessly with the power amp simulator, cab sims and the other amazing features you know and love about your Torpedo C.A.B. M - Two notes Audio Engineering have upgraded your pedal to the incredible Torpedo C.A.B. M+.
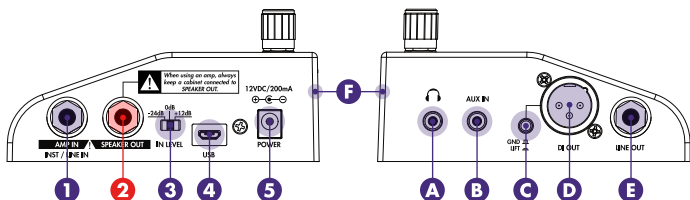

You now have an amazing clean pedal platform with a powerful and concise EQ, realistic tube feel and sounding power amp that makes the Torpedo C.A.B. M+ the ultimate pedal board solution for players who want, or need, to go direct.

Torpedo C.A.B. M+ comes with a carefully picked selection of 32 Two notes virtual cabinets (dynamic IR technology), a clean preamp based on an all original '74 SilverFace B'man, tube power-amp emulations and a wide range of effects designed to shape your tone the way you hear it in your head.
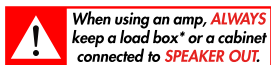

- Critically acclaimed DynIR technology powering Dual-miked Virtual Cabinets;
- 300+ additional Virtual Cabinets to audition via the cabinet library. Explore official cabinets from MESA/Boogie™, Celestion™, Orange™, and many more at store.two-notes.com;

- Compact dual-IR loader;
- Enhancer, Noise Gate, Reverb, Parametric Equaliser;
- Go direct with your pedalboard or tube amp (requires load box*);
- Immersive headphone experience;
- Wireless and USB control.

Inputs & Outputs

1 Connect your pedalboard, guitar or *amp output* (**!**) here.

⚠ **When using an amp, *ALWAYS* keep a load box* or a cabinet connected to *SPEAKER OUT*.**

2 Connect your load box* or cabinet here when plugging your amp into the AMP IN.

3 Adjust input level depending on the source plugged into the C.A.B. M+.

4 Control unit on a Windows or macOS computer through Torpedo Remote software.

**5** Power the unit with the supplied adapter.

A Headphones output.

B Auxiliary input to play along backing tracks from an external source.

C Ground lift switch to eliminate ground loops.

D Balanced XLR output to connect to a mixer or an audio interface.

E Balanced Jack output (TRS) to connect to a mixer or an audio interface.

F Memory card reader located on the rear panel to load your custom IR files.

❋ *Replace your cabinet with a load box to play your tube amp silently through Torpedo C.A.B. M+. We recommend a reactive load box such as Torpedo Captor for best results. Learn more on two-notes.com/torpedo-captor*
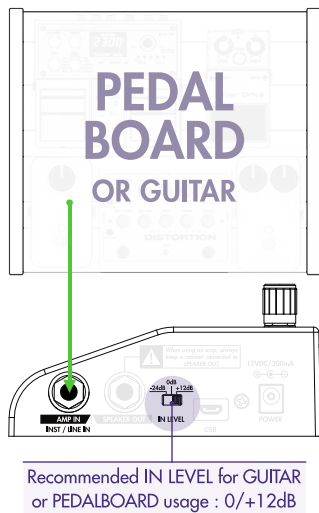

DI Your Amp

Place your Torpedo C.A.B. M+ between your tube amp and your speaker or a load box* to ensure you get the full experience of your amp tone direct to the desk.
Clean Pedal Platform

Place your Torpedo C.A.B. M+ at the end of your board, enable the Clean Preamp and Power Amp and go direct to your P.A. or audio interface.
